

## **Bale opener**

### **Uses and characteristics:**

It opens proportionally and electronic-weighing system. It can be used several sets together. Different kinds of chemical fibre can be blended proportionally.

### **Main specifications:**

Machine width: 1000mm, 1420mm  
Production capacities: 15~120kg/h  
Power: 4.5kW

## **Bale opener**

**Usage:** used for feeding fiber to opening machine, the operator can feed much quantity to bale opener but the fiber going to opening machine evenly.

### **Specifications:**

spare labor, prevent damage and jam for opening machine's roller  
Width: 1000mm, 1300mm, 1500mm  
Voltage: 3phases 380v, 50Hz  
Capacity: 80~200kg/h (accordingly by opening machine working speed)  
Power: 2.25kW
