

Wadding rolls compact machine

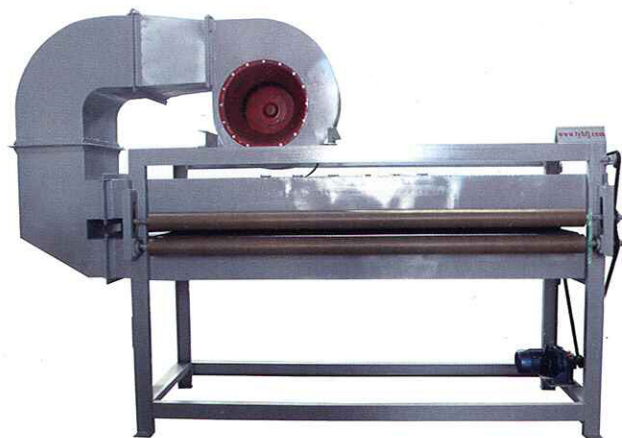

The machine is mainly used for fluffy non-woven wadding, spray bonded wadding, glue free wadding, stiff/hard wadding and soft needle punching felt package, with pneumatic type,

Low power consumption, high efficiency, make up for the traditional vacuum brought back poor effect, time-consuming and other defects.

1. Package length: 1500mm-2300mm
2. Maximum diameter before packing: 1200mm
3. After packing minimum diameter:400mm [can be customized]
4. Power: 15kW
5. Dimension: 2690mm × 2670mm × 2580mm (L × W × H)
6. Packing size: 2690mm × 1700mm × 2100mm (L × W × H)
7. N.W:1000Kg, G.W:1200kg

Air cooling machine

Usages:

The machine is used after heating oven or iron heating machine(calander),which can make the glue free wadding or spray bonded wadding or stiff/hard wadding cooling into shape.

Specification:

Voltage: Three-phase 380V,50Hz,

Power: 4.75kW

Working width: 2500~4500mm(can be customized)
